LIVE CELL LIVE SHOW

LIVE CELL, LIVE SHOW **EZSCOPE 101 IS A DEDICATED** LIVE CELL IMAGING SYSTEM

that helps to streamline your research workflow with improved efficiency and productivity, no more hassles to remove cells from incubator for observation. EzScope 101 brings 24/7 measurements under precisely controlled conditions in a non-perturbing environment. You can observe the images anytime, with walk-away convenience. Up to four samples can be monitoring simultaneously in a same incubator. This feature helps reduce repetitive action, saves time, and optimizes experiment efficiency.

Incubator Live View

Minimizes Experimental Variations

Designed to be used inside the incubator, without the need to remove your cells from incubator to enhance culture quality control.

Up to four units of EzScope can be setup in the same incubator and controlled by one computer. This enables the monitoring of samples simultaneously, reduces errors caused by environment variations.

Exceptional Image Quality

Adopts high contract brightfield optical configuration, coupled with precise motorized focusing, and two interchangeable magnifying objective lenses.

Remote Monitoring of Experiment

Allows flexible remote monitoring the assay via Windows-based remote desktop software.

Easy Image Editor

Captures and edits images easily with EzCapture software:

- Live preview for up to 4 units of EzScope
- Capture single image or time-lapse series
- · Flatfielding correction for even brightfield background
- Time-lapse video output
- Spatial calibration
- Measure and convergence analysis

Applications
