

MSMAXI	MSSCREEN	miniRAPIDE	MSMIDI96	miniONE
Suitable for RFLP analysis, southern and northern blotting preps and high throughput analysis with up to 550 samples.	Multichannel compatible combs included as standard for maximum efficiency with high sample numbers. Screen an entire 96 well plate in a single run with excellent resolution and run length.	An ultra-compact self-contained system for routine molecular biology procedures and quick checks of samples. Buffer and gel volumes kept to a minimum to maximise current and separation speed. UV transparent for direct gel imaging	Rapidly screen a 96 well or PCR plate. Multichannel pipette loading with a 1.8cm run length allows samples to be resolved in under 30 minutes. Stretch version available for extended run length	An all in one power supply and gel tank with 3 preset voltages. Inbuilt timer to stop the run at the desired time and simple casting system for small, economical gels.
