HS-3 & HSL-3 Freeze drier

The HS-3 freeze drier is a general-purpose, high-performance pilot unit featuring stainless steel shelves with internal circulating heat transfer fluid for heating and cooling, enabling it to meet the stringent demands of the pharmaceutical and biotechnology industries. The key features of this unit are its drying options using up to six shelves with a total area of 1.95 m² and a shelf spacing of 60 mm, and a hydraulic vial stoppering device. The HS-3 is also ideal for product development and small-scale production activities.

The HS-3 comes with fully automatic controls as standard. The touch screen Scada system takes full control of the whole freeze drier. Please see additional information.

Also available in a clean room version, where all accessible parts are behind in a separate room. **UK Manufactured**
