

Labcold Cube Ice Makers

LITV - NDP20

Labcold Cubed Ice Makers produce cylindrical cubed ice that is both hygienic and clear so ideal for medical and laboratory applications. The unique cylindrical shape makes them slower to melt than normal cubes.

Robustly constructed from stainless steel with well-insulated plastic collection bins and a lime scale reducing spray system.

Labcold Ice Makers require both a water and electricity supply and a drain at least 150mm below the ice maker.

Installation of an anti-scale filter is advised in areas with medium or high limescale content (hard water).
