

VIP ECO

-80°C Chest Freezers

84L / 180L

PHCbi's MDF-DC102VH-PE and MDF-DC202VH-PE VIP ECO Chest Freezers provide maximum sample storage capacity within an optimum footprint combined with industry leading cooling performance and reliability for an ideal long-term preservation solution.+

Optimum Sample Storage

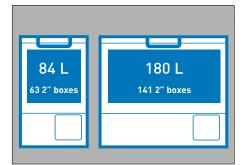

The use of patented VIP PLUS panels within the freezer cabinet provides a reduced wall thickness for maximum interior volume. This technology allows the MDF-DC102VH-PE and MDF-DC202VH-PE to require a small installation space with a great storage capacity.

Efficient Refrigeration

Naturally occurring hydrocarbon (HC) refrigerants provide more efficient cooling due to their high latent heat of evaporation. As well as improved performence this leads to lower GWP.

Ease of Use & Intelligent Security

The OLED panel has good visibility and intuitive operation. The USB port and data log functions simplifies temperature data and events management

Personal Storage

Ideal for reliable storage of small volume clinical trial samples and temperature control testing as well as for a wide variety of other biological applications.

Dependable Preservation

Quality of design and manufacture ensures trusted and reliable storage that maintains the integrity of precious samples.

Uniform Sample Storage

The uniform and stable temperatures provided are ideal for storage of DNA, RNA and other important biological samples.

VIP ECO -80°C Chest Freezers

Specially developed single-compressor system

The unique auto-cascade system uses a single compressor for efficient cooling, enabling an extremely small footprint.

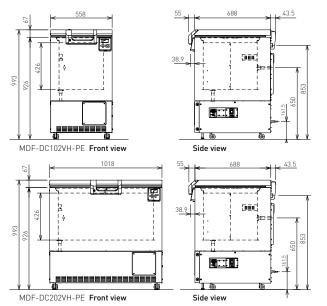

The highly efficient refrigeration system provides uniform and stable ultra-low temperatures down to -86°C.

Filterless Design

The unique cooling circuit makes the inconvenient customer maintenance procedure of filter cleaning unnecessary.

Minimal Footprint

PHCbi VIP ECO ULT freezers provide up to 30% more storage capacity than a conventionally insulated freezer without increasing the footprint.5) The MDF-DC102VH-PE and MDF-DC202VH-PE feature VIP PLUS vacuum panels for increased energy efficiency and cooling performance.

Appearance and specifications are subject to change without notice

1) Exterior dimensions of main cabinet only, excluding handle and other external projections - See dimensions drawings on website for full details.

MDF-S3085-PW

- Air temperature measured at freezer centre, ambient temperature +30°C, no load
- 3) Nominal value Background noise 20dB[A].
 4) Requires sensor cover MTR-C8-PW.
 5) Compared with the MDF-193.

- Recorder housing
