Thermo Scientific 384-well Polypropylene Plates

Nunc 384-well Polypropylene Plates provide cost savings when storing compounds for small volume applications.

Polypropylene is the ideal storage plate because it has a lower binding capacity so proteins or DNA will not bind, allowing complete sample recovery. Withstands temperatures from -80°C to +121°C. Offered in a variety of colors for quick identification of your storage plates.

details

- Conical wells offer optimal sample recovery
- Rounded square wells minimize wicking (capillary action)
- The variety of colors is for quick identification of storage plates
- Chemically resistant to DMSO
- Round bottom improves mixing
- U384-well plates working volume range: 10-100 µL/well
- V384-well plates working volume range: 4-120 µL/well
- Certified RNase-free

Compliance: All Thermo Scientific microplates meet the recommendation of American National Standards Institute (ANSI).

		mm
	Total height of plate	**14.4 ± 0.25**
H2	Vertical distance from inside well bottom to resting plane	2.7
H3	Inside depth of well	11.7
H4	Vertical distance from external well bottom to resting plane	1.8
H5	Height of flange	2.7
D1	Internal well dimensions, top	3.7
D2	Internal well dimensions, bottom	3.0
F1	Depth of flange	1.8

384-Well Conical Bottom Polypropylene Plates
